# Pioneer

## Your Compactor On Autopilot

Predictive hauling without packouts  
Real-time fullness insights  
Accurate sustainability reports

HAULS REDUCED

**46%**

TONS DISPOSED

**182**

GHG REDUCED

**46%**

ANNUAL NET SAVINGS

**\$6,000**

Avoid low-tonnage hauls, prevent pack-outs and eliminate heavy loads with Pioneer.

Pioneer's real-time electronic monitoring saves time and money by preventing false "full" notifications and reducing labor hours by checking inaccurate pressure gauges.

*We have no more over-full emergencies or Friday freak-outs. It's just not an operational problem I spend time on anymore.*

## HARDWARE

- ✓ Reliable cellular connection
- ✓ Internal memory to prevent data loss
- ✓ AC & DC power input compatibility
- ✓ Water-resistant case
- ✓ Compact size fits Power Unit enclosure

# Continuously Improving Electronic Monitoring

Installs in 15 minutes on any compactor

Measures fullness in real-time

Predicts next pickup using machine learning

Automatically schedules next haul

## Savings & Environmental Impact Reports

No more typing in data to get reports!

Pioneer leverages Discovery's invoice auditing process to confirm hauls and enrich ESG reports with actual weight data.

Use this data for "actual meter reads" with your annual GRESB, ENERGY STAR Portfolio Manager or other standards-based report.
