

3 Benefits a Mobile Video Solution Provides for School Buses

A school bus driver has one primary goal: Transport kids to and from school safely. It can be a difficult task when distracted and/or negligent motorists ignore the laws regarding driving around school buses.

A mobile video solution helps school transportation directors keep students safe by catching violators and observing bus driver behavior.

Why Consider Mobile Video Solution?

There are several reasons to consider a mobile video solution for a school bus. During one day in 2019, over 130,900 school bus drivers across 39 states reported 95,319 illegal passes while their buses' red lights were flashing and stop arms were extended. That's 3,971 illegal passes per hour and 66 per minute.

Making Safety a Priority

The biggest reason to implement a mobile video solution is to keep everyone safe. Fining stop-arm violators will deter them from making the same mistake again and making the streets safer for children when loading or unloading from a school bus, and side and rear cameras will help the driver navigate congested areas and avoid accidents.

Exonerate Your Driver

The road is filled with distracted motorists and inattentive pedestrians. Without a mobile video system, an accident turns into a he said, she said situation, or you must rely on eyewitnesses to back you up. Also, you can get an explanation for a hard brake. Was the driver driving erratically, or did a car cut off the bus while trying to turn at a stoplight?

Tell the Whole Story

Everyone wants to know the truth, and a mobile video solution shows exactly what happened inside and outside the vehicle. It can be difficult for bus drivers to remember all the details of an incident exactly as they happened. Bus drivers have enough to worry about when it comes to keeping their passengers safe. Cameras can corroborate their story and fill in the blanks where the details are fuzzy. Mobile video solutions help protect your children to ensure everyone arrives at their destination safely.

About Pro-Vision

Founded in 2003, Pro-Vision is a leading video technology solutions provider trusted by thousands of organizations in 58 countries. Pro-Vision solutions include vehicle video recording systems, body-worn cameras, data management and cloud-based storage solutions. Pro-Vision's transit, law enforcement and commercial partners utilize these solutions to enhance safety, increase productivity and protect critical assets.
